My Interest in Florida

- Providing community-based programs to increase breastfeeding duration, especially in rural and under-resourced communities.
- Increasing medical student education on lactation management and support with collaboration on clinical rotation opportunities.
- Integrating medical care and public health policy considerations to improve maternal and infant health for underserved communities.

Expertise/Skills

- Lactation/breastfeeding management
- Increasing culturally appropriate care
- Maternal and infant health
- Community programs
- Home visiting research
- Public health

Research and/or Projects

Interested in a collaboration of public health-medicine for increasing breastfeeding duration in rural communities.
