## My Interest in Florida

I am interested in collaborations focused on ongoing environmental issues facing Florida revolving around themes such as:

- Geomorphic dynamics including coastal and fluvial erosion and sedimentation.
- Freshwater systems (e.g., rivers, springs, lakes).
- Biodiversity of unique North Florida flora and fauna, especially aquatic organisms.

## Expertise/Skills

- Geomorphology
- Evolutionary biology and population genetics
- Experience working on interdisciplinary research teams

## Research and/or Projects

Biodiversity of freshwater fishes of the SE United States

Fluvial geomorphology
