## My Interest in Florida

- Improving healthcare accessibility and equity in Florida, especially for disadvantaged people (e.g., elderly people and rural communities)
- Understanding economic development/growth in Florida and designing sociotechnical tools to help improve economic growth of Florida
- System Resilience and Sustainability

## Expertise/Skills

- Big Data Analytics
- Machine Learning
- Human-Centered Computing
- Smart Communities

## Research and/or Projects

I have a very diverse background with BS in Transportation Engineering, MS in Automation, PhD in Computer Science, and Postdoc in Computational Social Science. My research aims to address scientific and societal challenges related to Mobility, Energy, Economy, and Healthcare with Human-centered Computing, Machine Learning, and Big Data Analytics.
